- Digital TV Module Ready
- NAVIGON MyRoutes
- Premium TMC
- Spoken TMC
- TMC Routing Info
- NAVIGON Last Mile
- FreshMaps included

## Real City<sup>3D</sup>

offers you a whole new dimension in navigation. Europe's main cities have never been replicated so true to detail before. Streets, buildings with real fronts, road markings such as zebra crossings and even traffic lights are all displayed three-dimensionally on the screen. This unique display provides users with even better orientation than ever before, whilst making every city drive a special experience.

## Voice Interaction Pro

The new generation of Voice Command turns your NAVIGON into an intelligent listener, so all the important functions can be performed conveniently via voice commands, once the function has been activated with just the lightest touch on the real glass surface. Talk to the system in colloquial sentences, for example, as if you were asking a friend where the nearest Italian restaurant is. Or say a telephone number or a contact's name and your NAVIGON will dial for you directly. So you're in control the whole time – almost without having to take your hands from the steering wheel.

## NAVIGON Live Services (8450 Live)

When you need important information, you need it right away. And the quicker, the better. With NAVIGON Live Services, you'll be kept up to date at all times. Traffic Live, Mobile Safety Camera Live, Clever Parking Live and Weather Live will provide you with all the important information you need while driving. For all other information to do with special-destination searches, Google Local Search is there for you. So you'll find that knowledge doesn't just make you smarter – but faster, too.

## Media Player

Should you get caught in traffic or have a long wait, the new Media Player provides perfect entertainment to stave off boredom. You can relax and watch films or click through your digital photo album on the large 5" display. And as everybody knows, music helps the time pass. So now you can play your favourite hits whenever you like – it doesn't get much more multimedia on the road than that.

## NAVIGON MyRoutes

Whatever kind of driver you are, NAVIGON MyRoutes recommends the best route every time, adapted to your personal driving style, the day of the week and the time of day. In addition, your NAVIGON also displays up to two further possible routes, providing a clear choice. You decide whether you follow the recommended route or take one of the alternatives.

## Premium TMC

is the Traffic Message Channel for even the most demanding requirements. This is because the Premium version provides you with information that is even more current and detailed on anything that might block, divert or halt your progress.

## NAVIGON Last Mile

navigates you the last few metres of your journey after parking, all the way to your actual destination. Because not every destination you choose will have a parking space right outside. And so your NAVIGON guides you safely along the last stretch on foot. It will even find your car for you on the way back.

## Technical data

Map of Europe  
NAVIGON  
8410 | 8450 Live  
(40 countries)

<b>Display:</b>	Extra-large 5" touchscreen – surface made from genuine glass
